

Information Technology Practicum Engagement Report Conducted at Concentrix Nuvali

1.0 Overview of the Practicum Engagement

Company Background

Concentrix is a leading global technology and services company specializing in customer experience management and digital transformation. The organization partners with prominent brands worldwide to design, build, and deliver customer support and technical solutions across various industries. Among its major international accounts are prominent, US-based corporations such as Aetna in the healthcare sector, T-Mobile in telecommunications, and Enterprise in car rental and mobility services. In the Philippines, Concentrix is recognized as one of the largest private employers, maintaining an extensive network of operational sites and IT hubs nationwide. My practicum was conducted at the Concentrix Nuvali site, located in Santa Rosa City, Laguna. This facility serves as a critical strategic hub in the Southern Luzon region, housing a substantial workforce of agents and robust IT infrastructure to support high-traffic global accounts. Because the site operates continuously around the clock, maintaining hardware and software reliability is essential to prevent any disruption to the company's daily operations and client deliverables.

Nature of Assignments and Tasks

During my internship at Concentrix Nuvali, I was assigned to handle software remediation and workstation maintenance on the active production floors. Our main responsibility was to ensure that the computers used by the agents complied with company and client security baselines by running the latest required software

versions. We systematically audited and updated deployment packages across the production floor, managing several critical software applications during this remediation process. We performed version updates on Citrix Workspace to ensure stable and secure connections to client-side virtual desktops. We also applied necessary patches to Avaya One-X Communicator, which is the primary corporate VoIP softphone tool used for customer calls, to prevent audio drops and call routing issues during shifts. Additionally, we handled updates for Google Chrome to apply recent security patches and maintain web compatibility with internal CRMs and web applications. Lastly, we installed and upgraded the .NET Desktop Runtime environment, which serves as a critical background dependency for various internal Windows applications, thereby eliminating software execution crashes on the floor. Because our tasks required working directly on the live production floors, we coordinated closely with our supervisor to execute these software updates efficiently during scheduled windows without disrupting active agents who were handling customer accounts.

2.0 Presentation of Output

This section covers the hands-on technical tasks I handled during my practicum. My assignments ranged from testing and setting up hardware to updating software and managing network settings, all of which helped keep the Concentrix Nuvali operations running smoothly.

One of my daily tasks was testing computer peripherals like keyboards, mice, and headsets. As shown in the image below, I used diagnostic tools to check the audio and microphone quality of the headsets to make sure they were still good for the production floor.

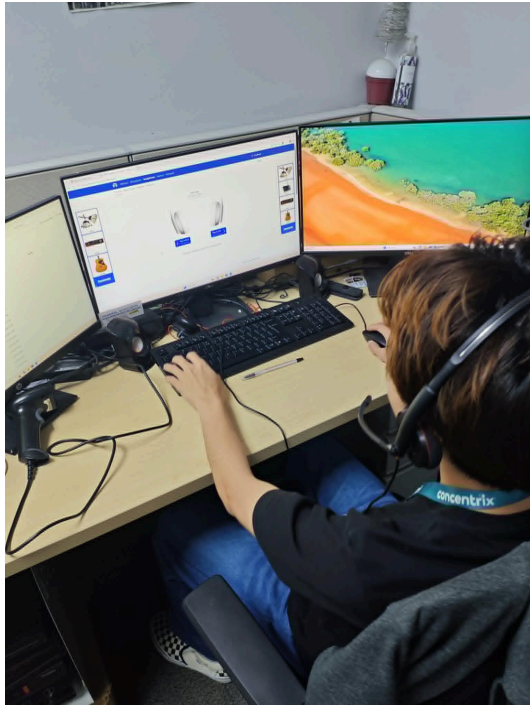

Figure 1. Testing headset audio and mic quality.

For the items that were still working but no longer needed by the agents, we prepared them for the company's donation program. In the photo below, I am organizing and packing these tested headsets into boxes so they are properly sorted and ready to be donated.

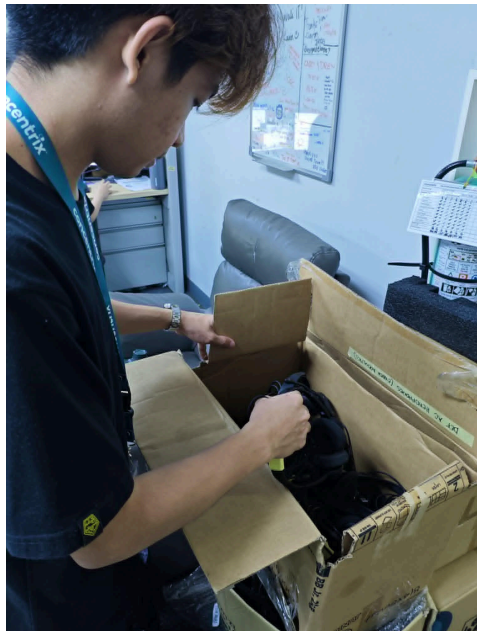

Figure 2. Packing working headsets for donation.

I was also assigned to set up and deploy new hardware. In the picture below, I am configuring mini PCs before they get deployed to the production floor. This process involves connecting the computers to our staging network and reimaging them with the company's standard operating system. A very important part of this step was installing a program called BigFix. The IT department uses this software to track the computers, push updates, and manage security settings remotely.

Figure 3. Setting up and reimaging mini PCs.

To update software without interrupting the agents while they were taking calls, I used Remote Desktop Connection (RDC). As seen in the image below, I accessed the production computers from my own workstation to install updates. This is how we applied the necessary patches for Citrix Workspace, Avaya One-X Communicator, Google Chrome, and the .NET Desktop Runtime to fix bugs and keep the systems secure.

Figure 4. Updating software remotely using RDC.

Aside from hardware and software, I also handled backend tasks using Active Directory (AD). Whenever a computer was moved or repurposed, I had to update its location in AD by moving it to the correct Organizational Unit (OU). This ensures that the computer gets the right network permissions and group policies automatically. Because Active Directory contains sensitive company data, user accounts, and security settings, I did not include any screenshots of it in this report to respect Concentrix's data privacy rules.

3.0 Synthesis of the Practicum Engagement

My OJT at Concentrix Nuvali was a huge learning experience for me. In school, we study the theories behind networking, programming, and system administration, but applying them on a live production floor is completely different. I learned how strict a real BPO company is when it comes to system security and avoiding downtime. Doing tasks like pushing software updates through RDC and moving computer

objects in Active Directory showed me that one small mistake can actually stop an agent from taking calls and doing their job.

One of my biggest realizations during this practicum is how important routine maintenance is for a massive company. Before this, I didn't think much about things like testing headsets, packing donations, or installing background software like BigFix and .NET runtime. But when you are supporting major global accounts, I realized that every working mouse and every updated browser matters. I also realized the importance of communicating with my supervisors and working carefully so we wouldn't interrupt the agents while they were on active shifts.

Looking back, this practicum gave me the real-world IT exposure I really needed. It helped me build my confidence in handling physical hardware deployments and remote software management. I am very thankful to the IT team at Concentrix Nuvali for guiding me throughout my hours. The hands-on skills and professional discipline I gained here will definitely help me when I graduate and start applying for real IT jobs in the future.

Noah Yap

IT Operations – Supervisor

Concentrix Corporation

3F One Evotech, Nuvali Sta. Rosa, Laguna, Philippines

Dear **Mr. Noah**,

The B.S. in Information Technology program of Mapúa Malayán Colleges Laguna requires their students to undergo Practicum program for a minimum of **486** hours in an academic calendar that will prepare our students to be job-ready after completing their curriculum. This program intends to enable our students to acquire and practice the knowledge and skills expected of a graduate of a B.S. IT program which, in turn, would guarantee continuous supply of IT professionals needed by your company.

We believe that your company can provide the relevant exposure necessary for our students to achieve the intended learning outcomes for the B.S. in Information Technology program. In this regard, I would like to endorse **Mr. Vincent Gilbert A. Nuñez** to have his practicum activities in your company as requested.

We thank you for your confidence and trust with us and we look forward to a more meaningful linkage that is mutually beneficial to our students and your company.

With warm regards,

ADOMAR L. ILAO, DIT

BSIT Program Chair

PRACTICUM CONFIRMATION AND ACCEPTANCE FORM

IMPORTANT INFORMATION

- STUDENTS ACCEPTED FOR PRACTICUM IN A HOST COMPANY WILL HAVE TO ACCOMPLISH THIS FORM.
- ASK THE PRACTICUM SUPERVISOR/ COMPANY REPRESENTATIVE TO FILL IN THE DETAILS OF THE TRAINING.
- SUBMIT TO THE PRACTICUM ADVISER/COORDINATOR PRIOR TO THE START OF TRAINING.

NAME OF STUDENT	Vincent Gilbert A. Nuñez	STUDENT NUMBER	2022152411
COURSE CODE	IT199F	SY/TERM ENROLLED	2025-26/ 3rd Term

This is to certify that Vincent Gilbert A. Nuñez (name of student-trainee) has been accepted for practicum at Concentrix, 3F One Evotech Building Nuvali, Santa Rosa, Laguna (name and address of establishment) and will be attached to the IT OPERATIONS department/s for a minimum of, but not limited to 486 hours. Training will commence on April 21, 2026 and is expected to end on July 16, 2026. Attached is the list of requirements.

STUDENT TRAINING AGREEMENT AND LIABILITY WAIVER

IMPORTANT INFORMATION

- THIS FORM IS TO BE ACCOMPLISHED AND SUBMITTED BY STUDENT TRAINEE TO THE PRACTICUM ADVISER BEFORE STARTING THE PRACTICUM.
- READ AND UNDERSTAND THE PROVISIONS OF THIS AGREEMENT AND WAIVER.
- ENSURE THAT ALL SIGNATORIES SIGN THE FORM.

I, Vincent Gilbert A. Nuñez, and a student of MALAYAN COLLEGES LAGUNA (hereinafter referred to as "MCL", do hereby voluntarily undergo on-the-job training at Concentrix, hereinafter referred to as the "Host Company", located at 3F One Evotech Building Nuvali, Santa Rosa, Laguna, under the following terms and conditions:

a. That the practicum training will commence on April 21, 2026 and ends on July 16, 2026 and will have to complete a minimum of 486 hours required for the on-the-job training;

b. That I shall observe proper decorum and act professionally at all times and abide by the Company's rules and regulations and comply with those imposed for the training program, otherwise, I shall be excluded from further participation;

c. That in the course of my training program, I may have access to information which may be of confidential in nature and proprietary to the Company, for which I may be required to execute a confidentiality and non-disclosure agreement as a prerequisite to my participation in the training program;

d. That the time I will spend on the training program in the completion of my on-the-job training requirements will not and should not be interpreted or construed as working hours and should be regarded as non-compensable. Provided that, the Company may, as a unilateral act of liberality or generosity on their part, provide me with meal, travel, transportation allowances, accommodations, etc.;

e. That I fully understand that notwithstanding the allowances enumerated in the preceding section which I may receive, there exists no labor-management and/or employer/employee relationship between me and the Company where I will undergo my training;

f. That I shall exercise due care and diligence in the tasks assigned to me and personally be made answerable for any and all liabilities for damage to property or injury to third person, which may be occasioned by my intentional or negligent acts during the course of my on-the-job training;

g. That I shall likewise hold the Host Company and MCL free and harmless from any and all liability and responsibility for any sickness or injury to myself and third parties and damage to property which I may sustain and/or may occur at any time during the training program, including time spent in traveling to and from any and all premises and locations where I may be required to go to as part of my training program;

h. That the Company reserves the right to discontinue my training on reasonable grounds upon written notice to MCL and myself. Additionally, in the event my training program is discontinued for reasons attributable only to myself, I may be made to reimburse the Host Company for any/all the allowances, stipends, etc., which I may have received from them during and prior to the termination of my training program;

i. That in addition to my liability under section g and for the pre-termination of my training program provided for under section h hereof, I may be subjected further to disciplinary action in accordance with the school's student manual and/or be a ground for disqualification from graduation;

Signed on this 25 day of April 2026.

TRAINING PLAN

NAME	Vincent Gilbert A. Nuñez	COURSE CODE	IT199F
PROGRAM & STUDENT NO.	2022152411	COURSE TITLE	I.T. PRACTICUM

STUDENT OUTCOMES

- CO1: Identify, analyze, and design business process solution to the problem by the organization.
- CO2: Apply the different concepts of system analysis and design, software engineering, database management, and programming courses in the problem solving process in the organization, and
- CO3: Acquire new knowledge and experience while in the organization.

AREAS / PHASES OF TRAINING AND TIME ALLOTMENT

- A. Orientation – 8 hours
B. IT and Network Services – 398 hours
C. Technical Documentation – 80 hours

EVALUATION GUIDELINES & COURSE OUTCOMES

DEMONSTRATION OF SOFT SKILLS (40%)	DEMONSTRATION OF TECHNICAL SKILLS (60%)
KEY AREAS COMMUNICATION SKILLS (20%) Relate to co-trainees/supervisors terminologies and rules Recite procedures and instructions needed for the tasks Identify and describe safety signs and symbols Ask critical questions related to the tasks Produce well-written regular and incident reports Prepares and presents reports using Information and Communication Technology (ICT) PROFESSIONAL DEPORTMENT (20%) Observes proper grooming and attire Reports to work regularly on time and as necessary, even beyond prescribed working hour Acts according to the job description given by the company Willing to accept new tasks apart from the usual routine and responsibilities Delivers quality output on time Demonstrates respect for different individuals INITIATIVE (+5%) Volunteers to perform tasks beyond routine tasks	KEY AREAS IT and Network Services SKILLS (40%) • Able to Perform Network Troubleshooting (10%) • Able to Utilize Network Diagnostic Tools: Use command-line tools (e.g., Ping, Tracert, Ipconfig) (10%) • Deploy System Images (5%) • Software Installation & Patching (5%) • Able to Execute Hardware Maintenance (5%) • Cable Management (5%) Technical Documentation SKILLS (20%) • Ticket Management (5%) • Technical Report (15%) INITIATIVE (+5%) Volunteers to perform tasks beyond routine tasks
